

IMPORTANT THINGS TO KNOW:

*Please wear comfortable clothing and footwear to your procedure and leave all valuables including jewelry at home. No contact lenses.

*On the day of your procedure bring your ID, insurance card, and a current list of medications.

*Women of childbearing age will be asked for an urine sample prior to the procedure.

You **MUST** have a driver accompany you to your procedure and remain in the center until you are discharged. This is for your safety due to the lingering effects of sedation. This policy is enforced at each facility.

YOUR PROCEDURE WILL BE CANCELLED IF YOU DO NOT HAVE A DRIVER.

YOU MAY NOT USE PUBLIC TRANSPORTATION.

*You should not drive an automobile, work, drink alcohol or operate heavy machinery for at least 12 hours after the procedure due to sedation effects of the medications used during your procedure. You may resume normal activities the next day.

APPOINTMENT TIMES: You will be assessed in the morning and may be cancelled due to your medical status at that time. The staff strives to adhere to your appointment time, however delays may occur and we request your understanding of these delays.

CANCELLATION POLICY:

There will be a \$200.00 fee assessed to your account if you fail to cancel within three (3) business days prior to your procedure.

**You may receive bills from different offices, but all related to your procedure:

Pathology for polyps or biopsies, Anesthesiology for your anesthesia, the Facility where you have the procedure and the Physician performing the procedure.

If your insurance plan requires a referral for this procedure, you must have one delivered to our office, **one week prior to your procedure date or your procedure will be cancelled.

If your insurance plan changes, you must notify our office **one week prior to your procedure date or your procedure may be cancelled.

WHAT TO EXPECT THE DAY OF YOUR PROCEDURE:

- Shortly after arriving, a nurse will take you back for you to get changed and IV started.
- Once you are settled, your driver can come back and sit with you until you are taken to the Procedure Room
- Your driver should stay in the waiting room until after your procedure
- After your procedure, you will get dressed and have some crackers and water while you wait for the physician to speak with you about their findings. Your driver will be with you during this time.
- You will be taken out in a wheelchair due to anesthesia.

IMPORTANT FINANCIAL INFORMATION:

Colonoscopy categories:

Preventative Colonoscopy Screening: Patient is without symptoms and is 50 or older. Unless you are African American, in which case the guideline is 45. Or if you have a family history of colon cancer, in which case a screening can be performed 10 years prior to the age of the family member when diagnosed – mom, dad or siblings. (CPT 45378)

Surveillance Colonoscopy: Patient is without symptoms but may have a personal history of GI disease, colon polyps and/or cancer. Patients in this category are requested to undergo colonoscopy at shortened intervals (every 2-5 years).

Diagnostic Colonoscopy: Patient has current gastrointestinal symptoms, GI disease, iron deficiency anemia and/or any other abnormal tests. (CPT 45380)

IF YOUR COLONOSCOPY IS ORDERED BECAUSE OF A SYMPTOM, IT CANNOT BE BILLED AS A SCREENING.

A physician cannot change a diagnosis so that you can be eligible for a screening. If a diagnosis is documented on your record, that has to be included in the billing of the colonoscopy. If your insurance company tells you the doctor can change or add a CPT or diagnosis code, please get their name and phone number because this information is false! That is insurance fraud.
